Kata Pengantar

Publikasi Statistik Kelapa Sawit Indonesia 2023 ini merupakan seri publikasi tahunan Badan Pusat Statistik. Data yang disajikan adalah data luas areal dan produksi kelapa sawit menurut provinsi dan status perusahaan serta data ekspor dan impor yang dirinci menurut negara tujuan dan negara asal. Sumber data yang digunakan adalah data hasil Survei Perusahaan Perkebunan Tahun 2023 dan data perkebunan rakyat dari Direktorat Jenderal Perkebunan untuk menjadi data perkebunan nasional, serta data hasil kompilasi dokumen ekspor dan impor dari Direktorat Jenderal Bea dan Cukai.

Diharapkan publikasi ini dapat bermanfaat bagi para pengambil kebijakan di instansi pemerintah dan swasta, peneliti, mahasiswa, dan pengguna data lainnya. Untuk memudahkan pemahaman dan pemanfaatan data, disertakan pula penjelasan teknis dan ulasan singkat dari data statistik yang disajikan.

Ucapan terima kasih dan penghargaan kepada semua pihak yang telah membantu dalam persiapan publikasi ini. Kritik dan saran dari pengguna data sangat diharapkan guna perbaikan publikasi ini di masa yang akan datang.

Jakarta, November 2024

Plt. Kepala Badan Pusat Statistik

Amalia Adininggar Widyasanti

Preface

Publication of The 2023 Indonesian Oil Palm Statistics is an annual publication of BPS-Statistics Indonesia. This publication presents data of area and production on palm oil by province and by category of producers, and the export and import of palm oil by country of destination and by country of origin. The data sources are the result of the Estate Crops Establishment Survey 2023, smallholders data from Directorate General of Estate Crops, and data compilation of custom documents from Directorate General of Customs.

Hopefully this publication will be useful for the decision makers in government and private institutions, researchers, students, and other data users. The understanding and utilization of data is also include technical explanation and summary of statistical data.

Many thanks and appreciations addressed to all parties who had been involved in the preparation of this publication. Comments and suggestions to improve this publication in the future are always welcome.

Jakarta, November 2024

Acting Chief Statistician

1. PENDAHULUAN

1.1 Latar Belakang

Sektor pertanian mempunyai peranan yang cukup penting dalam kegiatan perekonomian di Indonesia, hal ini dapat dilihat dari kontribusinya terhadap Produk Domestik Bruto (PDB) yang cukup besar yaitu sekitar 12,53 persen pada tahun 2023 atau merupakan urutan ketiga setelah sektor Industri Pengolahan sebesar 18,67 persen dan sektor Perdagangan Besar dan Eceran; Reparasi Mobil dan Sepeda Motor sebesar 12,94 persen.

Salah satu subsektor yang cukup besar potensinya adalah subsektor perkebunan. Kontribusi subsektor perkebunan tahun 2023 yaitu sebesar 3,88 persen terhadap total PDB dan 30,97 persen terhadap sektor Pertanian, Kehutanan, dan Perikanan atau merupakan urutan pertama pada sektor tersebut.

Kelapa sawit merupakan salah satu komoditas hasil perkebunan yang mempunyai peran cukup penting dalam kegiatan perekonomian di Indonesia karena kemampuannya menghasilkan minyak nabati yang banyak dibutuhkan oleh sektor industri¹. Sifatnya yang tahan oksidasi dengan tekanan tinggi dan kemampuannya melarutkan bahan kimia yang tidak larut oleh bahan pelarut lainnya, serta daya melapis yang tinggi membuat minyak kelapa sawit dapat digunakan untuk beragam peruntukan, diantaranya yaitu untuk minyak masak, minyak industri, maupun bahan bakar (biodiesel).

Sebagai negara penghasil minyak sawit terbesar di dunia, Indonesia mempunyai potensi yang besar untuk memasarkan minyak sawit dan inti sawit baik di dalam maupun luar negeri. Pasar potensial yang akan menyerap pemasaran minyak sawit (CPO) dan minyak inti sawit (PKO) adalah industri fraksinasi/ranifasi (terutama industri minyak goreng), lemak khusus (cocoa

1. INTRODUCTION

1.1 Background

The agricultural sector has a fairly important role in economic activities in Indonesia, this can be seen from its contribution to the Gross Domestic Product (GDP) which is quite large, which is around 12.53 percent in 2023 or is the third after the Processing Industry sector at 18.67 percent and the Wholesale and Retail Trade sector; Car and Motorcycle Repair by 12.94 percent.

One of the subsectors that has considerable potential is the plantation subsector. The contribution of the plantation subsector in 2023 is 3.88 percent to total GDP and 30.97 percent to the Agriculture, Forestry, and Fisheries sector or is the first in the sector.

Oil palm is one of the plantation products that has a fairly important role in economic activities in Indonesia because of its ability to produce vegetable oil which is much needed by the industrial sector¹. Its oxidation-resistant properties at high pressure and its ability to dissolve chemicals that are insoluble by other solvents, as well as its high coating power make palm oil can be used for various purposes, including cooking oil, industrial oil, and fuel (biodiesel).

As the world's largest palm oil producer, Indonesia has great potential to market palm oil and palm kernel both domestically and abroad. Potential markets that will absorb the marketing of palm oil (CPO) and palm kernel oil (PKO) are the fractionation/ranifation industry (especially the cooking oil industry), special fats (cocoa butter substitute), margarine/

butter substitute), margarine/shortening, oleochemical, dan sabun mandi.

Dalam rangka menunjang peningkatan pembangunan industri minyak sawit di Indonesia, Badan Pusat Statistik menerbitkan buku **Statistik Kelapa Sawit Indonesia 2023** untuk menyediakan informasi mengenai potensi kelapa sawit Indonesia.

1.2 Ruang Lingkup

Publikasi ini memuat data dan ulasan ringkas tentang perkembangan luas areal dan produksi kelapa sawit yang dirinci menurut status pengusahaannya yaitu perkebunan besar negara, perkebunan besar swasta, dan perkebunan rakyat, serta disajikan menurut provinsi. Perkembangan ekspor dan impor kelapa sawit Indonesia disajikan menurut jenis komoditas (kode HS - Harmonized System) dan negara tujuan/asal.

1.3 Metodologi

Data yang disajikan dalam publikasi ini berupa tabel-tabel, gambar/grafik dan ulasan ringkas yang berupa analisis deskriptif dengan melihat pada pertumbuhan, distribusi, dan kontribusi atau persentase. Data luas areal dan produksi perkebunan besar bersumber dari Direktorat Statistik Tanaman Pangan, Hortikultura dan Perkebunan-BPS, data luas areal dan produksi perkebunan rakyat bersumber dari Direktorat Jenderal Perkebunan-Kementerian Pertanian, serta data ekspor-impor diperoleh dari Direktorat Statistik Distribusi-BPS.

Data luas areal dan produksi perkebunan besar negara dan swasta diperoleh dari hasil Survei Perusahaan Perkebunan yang dilakukan dengan pencacahan secara lengkap terhadap seluruh administrasi perusahaan perkebunan di seluruh Indonesia. Pada tahun 2019, cakupan

shortening, oleochemicals, and bath soap.

*In order to support the improvement of the development of the palm oil industry in Indonesia, the Central Statistics Agency published the book **Indonesia Oil Palm Statistics 2023** to provide information on the potential of Indonesian oil palm.*

1.2 Scope

This publication contains data and a brief review of the development of the area and oil palm production detailed according to the status of the business, namely large state plantations, large private plantations, and smallholder plantations, and presented by province. The development of Indonesia's palm oil exports and imports is presented by type of commodity (HS code - Harmonized System) and destination/country of origin.

1.3 Methodology

The data presented in this publication are in the form of tables, figures/graphs and brief reviews in the form of descriptive analysis by looking at growth, distribution, and contribution or percentage. Data on the area and production of estate crops establishment are sourced from the Directorate of Food Crops, Horticulture, and Estate Crops Statistics-BPS, data on the area and production of smallholder are sourced from the Directorate General of Estate Crops - Ministry of Agriculture, and export-import data is obtained from Directorate of Distribution Statistics-BPS.

Data on area and production of government and private estate crops establishment were obtained from the results of the Plantation Estate Survey which was carried out by a complete enumeration of all establishment administrations throughout Indonesia. In 2019, the administrative

administratur perusahaan kelapa sawit sebesar 2.044 administratur. Perubahan cakupan administratur perusahaan kelapa sawit menyebabkan series data sebelum tahun 2018 tidak dapat dibandingkan dengan data tahun selanjutnya. Selain perubahan cakupan administratur, mulai tahun 2019 diimplementasikan sistem baru yaitu SEDAPP Online yang merupakan aplikasi untuk pelaporan data perusahaan perkebunan secara mandiri (*self enumeration*). Perusahaan yang belum melaporkan data secara mandiri, pengumpulan data dilakukan dengan cara wawancara langsung oleh petugas BPS ke kantor administratur, lalu data diinput pada aplikasi SEDAPP Online. Berdasarkan status angka, data luas dan produksi tahun 2022 dan 2023 merupakan angka tetap.

Data Ekspor diperoleh dengan cara pengumpulan data berdasarkan dokumen ekspor/Pemberitahuan Ekspor Barang (PEB) dan Pemberitahuan Ekspor Barang Tertentu (PEBT) yang diisi oleh eksportir dan telah diberikan ijin muat oleh Direktorat Jenderal Bea dan Cukai dan selanjutnya mengirimkannya ke BPS.

Data Impor diperoleh dengan cara pengumpulan data berdasarkan dokumen impor/Pemberitahuan Impor Barang (PIB) yang diisi oleh importir dan telah diberikan ijin bongkar oleh Direktorat Jenderal Bea dan Cukai dan selanjutnya mengirimkan dokumen tersebut ke BPS.

1.4 Konsep dan Definisi

Perusahaan Perkebunan adalah pelaku usaha perkebunan warga negara Indonesia atau badan hukum yang didirikan menurut hukum Indonesia dan berkedudukan di Indonesia yang mengelola usaha perkebunan dengan skala tertentu.

coverage of palm oil establishment was 2,044 administrators. Changes in the administrative scope of palm oil establishment cause the data series before 2018 unable to be compared with the data of the following year. In addition to the change in administrative scope, starting in 2019 a new system was implemented, namely SEDAPP Online which is an application for reporting data of estate crops establishment independently (self enumeration). Establishment that have not reported data independently, data collection is carried out by direct interviews by BPS officers to the administrative office, then the data is input on the SEDAPP Online application. Based on the status of the numbers, the extensive data and production for 2022 and 2023 are fixed figures.

Export data is obtained by collecting data based on export documents/Goods Export Notification (PEB) and Export Notification of Certain Goods (PEBT) which are filled out by the exporter and have been given a loading permit by the Directorate General of Customs and Excise and then send it to BPS.

Import data is obtained by collecting databasedonimportdocuments/GoodsImport Notification (PIB) filled out by the importer and has been granted a dismantling permit by the Directorate General of Customs and Excise and then sending the document to BPS.

1.4 Concept and Definitions

Estate Crops Establishment is an Indonesian citizen estate crops business actor or a legal entity established under Indonesian law and domiciled in Indonesia that manages an estate crops business on a certain scale.

Perkebunan Besar (PB) adalah perkebunan yang diselenggarakan atau dikelola secara komersial oleh perusahaan yang berbadan hukum. Perkebunan besar terdiri atas Perkebunan Besar Negara (PBN) dan Perkebunan Besar Swasta (PBS) Nasional/ Asing.

Perkebunan Rakyat (PR) (tidak berbadan hukum) adalah perkebunan yang diselenggarakan atau dikelola oleh rakyat/pekebun yang dikelompokkan dalam usaha kecil tanaman perkebunan rakyat dan usaha rumah tangga perkebunan rakyat.

Tanaman Belum Menghasilkan (TBM) adalah tanaman yang sampai pada saat pengamatan belum pernah memberikan hasil, karena masih muda atau tanaman sudah cukup umur tetapi belum dapat menghasilkan karena tidak cocok dengan iklim, ketinggian tempat, kondisi tanah dan sebagainya.

Tanaman Menghasilkan (TM) adalah tanaman yang sebelum saat pengamatan pernah memberikan hasil dan masih akan memberikan hasil, meskipun pada saat pengamatan sedang tidak menghasilkan.

Tanaman Tidak Menghasilkan/Tua/Rusak (TTM) adalah tanaman yang sudah tua, rusak, dan tidak memberikan hasil yang memadai lagi, walaupun ada hasilnya tetapi secara ekonomi sudah tidak produktif lagi (produksi kurang dari 15 persen dari produksi normal).

Produksi kelapa sawit yang disajikan pada publikasi ini berupa produksi olahan yaitu produksi primer yang telah diolah menjadi suatu bentuk barang jadi atau barang setengah jadi, sehingga nilai ekonomisnya lebih tinggi, dalam hal ini **minyak kelapa sawit Crude Palm Oil (CPO)**.

Large Estate Crops are estate crops that are organized or managed commercially by an establishment with a legal entity. Large estate crops consist of Government Estate Crops Establishment and Private Estate Crops Establishment.

Smallholders Estate Crops (unincorporated) are estate crops organized or managed by the people/smallholders who are grouped into small businesses, small-scale small.

Immature Crops are crops that until the time of observation have never given results, because they are young or the crops are old enough but have not been able to produce because they do not match the climate, the height of the place, soil conditions and so on.

Mature Crops are crops that have previously given production and will still give productions, even though at the time of observation they are not producing.

Non-Productive/Old/Damaged Crops are crops that are old, damaged, and no longer provide adequate yields, even though there are productions but are no longer economically productive (production is less than 15 percent of normal production).

The oil palm production presented in this publication is in the form of processed production, namely primary production that has been processed into a form of finished goods or semi-finished goods, so that the economic value is higher, in this case **Crude Palm Oil (CPO) palm oil**.

Produksi Kelapa Sawit Menurut Status Pengusahaan 2023

2. ULASAN RINGKAS

2.1 Informasi Luas Tutupan Lahan Kelapa Sawit Nasional

Definisi dari tutupan lahan (land cover) adalah wujud secara fisik vegetasi yang ada di permukaan bumi tanpa memperhatikan kegiatan manusia terhadap objek vegetasi (Syahbana, 2013). Hal ini sangat berbeda dengan definisi penggunaan lahan (land use) yang mengacu pada tujuan dan fungsi lahan tempat vegetasi tersebut diusahakan. Berdasarkan perbedaan definisi ini, maka adalah wajar terjadi perbedaan data dari setiap vegetasi jika pengumpulan data dilakukan dengan pendekatan land cover dan pendekatan land use tanpa menggunakan jembatan penghubung yang sesuai. Pada publikasi ini, jumlah luas areal kelapa sawit diperoleh dengan metode pelaporan dari daerah dan hasil survei. Tahun 2021 dilakukan kegiatan re-evaluasi luas tutupan kelapa sawit menggunakan penginderaan jauh. Perbedaan kedua metode menghasilkan luas areal yang akan dikonfirmasi (LAD).

2. BRIEF REVIEW

2.1 National Oil Palm Land Cover Information

The definition of land cover is the physical form of vegetation that exists on the earth's surface without paying attention to human activities on vegetation objects (Syahbana, 2013). This is very different from the definition of land use which refers to the purpose and function of the land where the vegetation is cultivated. Based on this difference in definition, it is natural for data to differ from each vegetation if data collection is carried out with a land cover approach and a land use approach without using appropriate connecting bridges. In this publication, the total area of oil palm was obtained by reporting methods from the regions and survey results. In 2021, a re-evaluation of the area of oil palm cover was carried out using remote sensing. The difference between the two methods results in the area to be confirmed.

2.2 Perkembangan Luas Areal Kelapa Sawit

Berdasarkan Gambar 1, luas perkebunan kelapa sawit berdasarkan *land used* dan produksi CPO pada tahun 2018 meningkat signifikan dibanding tahun-tahun sebelumnya. Peningkatan tersebut disebabkan oleh peningkatan cakupan administrasi perusahaan kelapa sawit, sehingga luas areal perkebunan kelapa sawit menjadi 14,33 juta hektar. Selanjutnya pada tahun 2019 sampai dengan 2023, luas areal perkebunan kelapa sawit berdasarkan *land used* terus mengalami peningkatan yang hampir stagnan. Pada tahun 2023 diperkirakan luas areal perkebunan kelapa sawit sebesar 15,93 juta hektar.

2.2 The Trend of Oil Palm Area

Based on Figure A, the area of oil palm plantations based on land use and CPO production in 2018 increased significantly compared to previous years. The increase was due to an increase in the administrative coverage of palm oil companies, so that the area of oil palm plantations was 14.33 million hectares. Furthermore, from 2019 to 2023, the area of oil palm plantations based on land use continues to increase almost stagnantly. In 2023, the area of oil palm plantations is estimated to be 15.93 million hectares.

Gambar 1. Luas Areal dan Produksi Kelapa Sawit Indonesia, 2019–2023

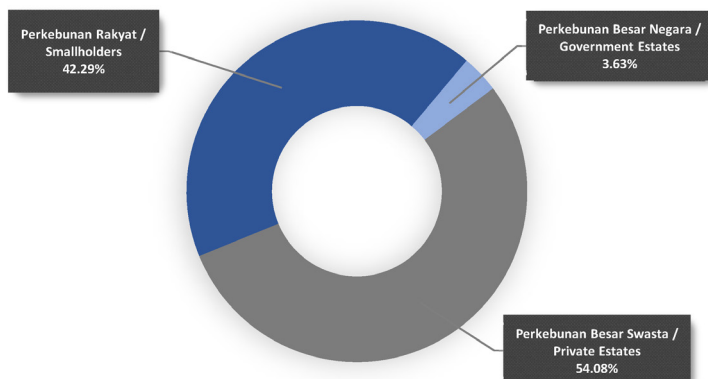

Figure 1. Area and Production of Indonesia Oil Palm, 2019–2023

Areal perkebunan kelapa sawit tersebar di 26 provinsi yaitu seluruh provinsi di Pulau Sumatera dan Kalimantan, Provinsi Jawa Barat, Banten, Sulawesi Tengah, Sulawesi Selatan, Sulawesi Tenggara, Sulawesi Barat, Gorontalo, Maluku, Maluku Utara, Papua dan Papua Barat. Pada tahun 2023, Provinsi Riau masih menjadi provinsi penghasil kelapa sawit terbesar dengan luas sebesar 3,40 juta hektar atau 21,36 persen dari total luas areal perkebunan kelapa sawit di Indonesia. Dari luas areal tersebut, Provinsi Riau menghasilkan 9,22 juta ton CPO. Luas areal dan produksi perkebunan kelapa sawit di Indonesia menurut provinsi tahun 2023 selengkapnya dapat dilihat pada Tabel 3.3.2.

Luas areal perkebunan kelapa sawit menurut status pengusahaan pada tahun 2023 tidak menunjukkan perubahan berarti. Seperti tahun sebelumnya, penguasaan luas areal perkebunan kelapa sawit masih didominasi oleh perkebunan besar swasta. Sebesar 8,61 juta hektar atau 54,08 persen perkebunan kelapa sawit dikuasai oleh perkebunan swasta; diikuti perkebunan rakyat yang menguasai 6,74 juta hektar atau 42,29 persen perkebunan kelapa sawit; serta sisanya 0,58 juta hektar atau 3,63 persen dikuasai oleh perkebunan besar negara (lihat Gambar 2).

The oil palm plantation area is spread across 26 provinces, namely all provinces on the islands of Sumatra and Kalimantan, West Java Province, Banten, Central Sulawesi, South Sulawesi, Southeast Sulawesi, West Sulawesi, Gorontalo, Maluku, North Maluku, Papua and West Papua. In 2023, Riau Province is still the largest oil palm producing province with an area of 3.40 million hectares or 21.36 percent of the total oil palm plantation area in Indonesia. From this area, Riau Province produces 9.22 million tons of CPO. The area and production of oil palm plantations in Indonesia by province in 2023 can be seen in Table 3.3.2.

The area of oil palm plantations according to category of producers in 2023 does not show significant changes. As in the previous year, the control of oil palm plantation areas is still dominated by private estates. It is 8.61 million hectares or 54.08 percent of oil palm plantations controlled by private estates; followed by smallholders which control 6.74 million hectares or 42.29 percent of oil palm plantations; and the remaining 0.58 million hectares or 3.63 percent are controlled by government estates (see Figure 2).

Gambar 2. Luas Areal Perkebunan Kelapa Sawit Indonesia Menurut Status Pengusahaan, 2023
 Figure 2. Indonesia Oil Palm Plantation Area by Category of Producers, 2023

2.3 Perkembangan Produksi Minyak Sawit (CPO)

Pada tahun 2022 terjadi peningkatan sebesar 3,76 persen dibanding tahun 2021 menjadi 46,82 juta ton. Pada tahun 2023, produksi CPO kembali mengalami peningkatan menjadi 47,08 juta ton. Produksi minyak sawit (CPO) terbesar tahun 2023 berasal dari Provinsi Riau dengan produksi sebesar 9,22 juta ton atau sekitar 19,59 persen dari total produksi Indonesia. Produksi terbesar selanjutnya berasal dari Provinsi Kalimantan Tengah dengan produksi sebesar 8,47 juta ton atau 17,98 persen. Produksi perkebunan kelapa sawit di Indonesia menurut provinsi tahun 2023 selengkapnya dapat dilihat pada Tabel 3.3.2.

Berdasarkan status pengusahaannya, pada tahun 2022 sebesar 60,26 persen dari produksi minyak sawit (CPO) atau 28,21 juta ton minyak sawit (CPO) berasal dari perkebunan besar swasta, sebesar 34,84 persen atau 16,31 juta ton dari perkebunan rakyat dan sisanya 4,90 persen atau 2,30 juta ton berasal dari perkebunan besar negara. Meskipun total produksi pada tahun 2023 mengalami peningkatan, struktur produksi menurut status perusahaan tidak jauh berbeda dari tahun-tahun sebelumnya, yakni didominasi oleh produksi perkebunan

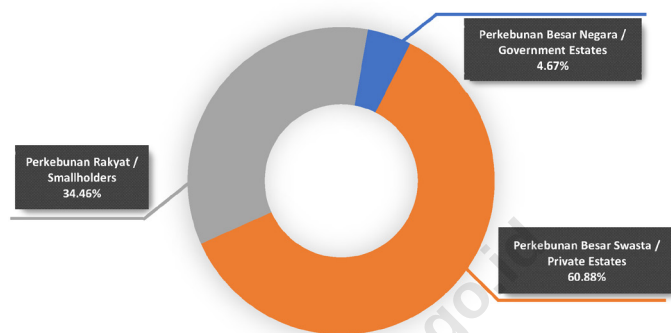

2.3 The Trend of Palm Oil Production (CPO)

In 2022, there was an increase of 3.76 percent compared to 2021 to 46.82 million tons. In 2023, CPO production also increase to 47.08 million tons. The largest palm oil production in 2023 comes from Riau Province with a production of 9.22 million tons or around 19.59 percent of Indonesia's total production. The next largest production came from Central Kalimantan Province with a production of 8.47 million tons or 17.98 percent. The total production of palm oil in Indonesia by province in 2023 can be seen in Table 3.3.2.

Based on its category of producers, in 2022 60.26 percent of palm oil production or 28.21 million tons of palm oil came from private estates, 34.84 percent or 16.31 million tons from smallholders and the remaining 4.90 percent or 2.30 million tons came from government estates. Although total production in 2023 has increased, the production structure according to category of producers is not much different from previous years, which is dominated by private estates production with an estimate of 28.66 million tons of CPO (60.88 percent); followed

swasta dengan perkiraan sebesar 28,66 juta ton CPO (60,88 persen); diikuti perkebunan rakyat dengan total produksi 16,22 juta ton (34,46 persen); serta sisanya sebesar 2,20 juta ton (4,67 persen) diproduksi oleh perkebunan besar negara (lihat Gambar 3).

by smallholders with a total production of 16.22 million tons (34.46 percent); and the remaining 2.20 million tons (4.67 percent) produced by government estates (see Figure 3).

Gambar 3. Produksi Minyak Sawit Indonesia Menurut Status Pengusahaan, 2023
Figure 3. Indonesia Palm Oil Production by Category of Producers, 2023

2.4 Perkembangan Ekspor Impor Minyak Sawit

Ekspor dan impor minyak sawit dirinci berdasarkan kelompok kode *Harmonized System* (HS) yaitu *Crude Palm Oil* (Kode HS 15111000), *Other Palm Oil* (Kode HS 15119000), *Crude Oil of Palm Kernel* (Kode HS 15132110), dan *Other Palm Oil Kernel* (Kode HS 15132900).

2.4.1. Ekspor Minyak Sawit

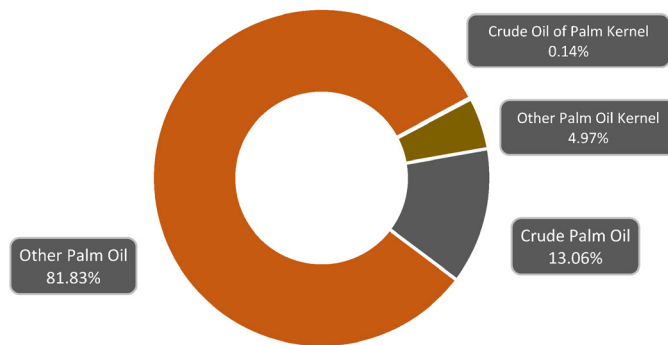

Berdasarkan kelompok HS minyak sawit, pada tahun 2023 ekspor terbesar adalah *Other Palm Oil* (HS 15119000) sebesar 81,83 persen terhadap total ekspor minyak sawit Indonesia. Selanjutnya, kontribusi ekspor minyak sawit terbesar adalah *Crude Palm Oil* (HS 15111000), *Other Palm Oil Kernel* (HS 15132900), dan *Crude Oil of Palm Kernel* (HS 15132110) dengan kontribusi masing-masing sebesar 13,06 persen, 4,97 persen, dan 0,14 persen terhadap total ekspor (lihat Gambar 4).

2.4 The Trend of Export Import Palm Oil

Palm oil exports and imports are detailed based on the Harmonized System (HS) code group, namely Crude Palm Oil (HS Code 15111000), Other Palm Oil (HS Code 15119000), Crude Oil of Palm Kernel (HS Code 15132110), and Other Palm Oil Kernel (HS Code 15132900).

2.4.1. Export of Palm Oil

Based on the palm oil HS group, in 2023 the largest export is Other Palm Oil (HS 15119000) with 81.83 percent of Indonesia's total palm oil exports. Furthermore, the largest contribution of palm oil exports is Crude Palm Oil (HS 15111000), Other Palm Oil Kernel (HS 15132900), and Crude Oil of Palm Kernel (HS 15132110) with contributions of 13.06 percent, 4.97 percent, and 0.14 percent to total exports, respectively (see Figure 4).

Gambar 4. Volume Ekspor Minyak Sawit Menurut Jenisnya, 2023
Figure 4. Volume Export of Palm Oil by Type, 2023

Dari sisi volume, ekspor minyak sawit selama tahun 2019 sampai tahun 2022 cenderung mengalami penurunan. Namun, pada tahun 2023 volume ekspor minyak sawit mengalami peningkatan. Penurunan ekspor minyak sawit terbesar terjadi pada tahun 2020 dengan volume ekspor sebesar 27,63 juta ton atau menurun 8,55 persen dibanding tahun 2019.

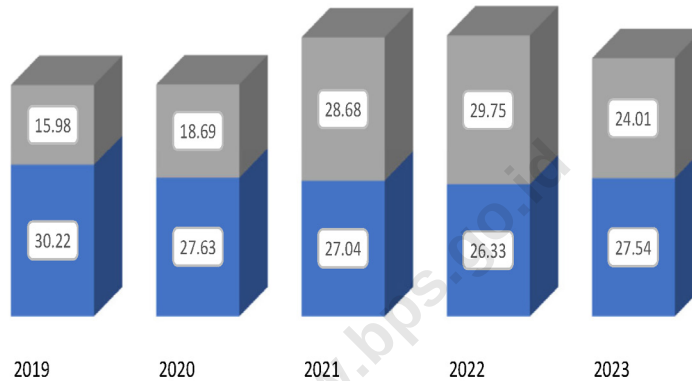

Meskipun volume ekspor cenderung menurun, penurunan tersebut tidak sejalan dengan nilai ekspor minyak sawit yang cenderung meningkat. Berdasarkan publikasi *World Bank Commodities Price Data (The Pink Sheet)*, pada tahun 2017 terjadi peningkatan rata-rata harga minyak sawit di pasar dunia sebesar 751 US\$/mt, sehingga menyebabkan peningkatan nilai ekspor hingga 27,32 persen dibanding tahun 2016. Peningkatan harga tersebut tidak berlangsung lama sebab pada tahun 2018 dan 2019, harga minyak sawit kembali mengalami penurunan menjadi 639 US\$/mt pada 2018 dan 601 US\$/mt pada 2019. Pada tahun 2020, harga minyak sawit di pasar dunia kembali melambung menjadi 752 US\$/mt. Kenaikan harga tersebut menyebabkan peningkatan nilai ekspor sebesar 16,94 persen dibanding 2019, meskipun dari sisi volume ekspor minyak sawit mengalami penurunan sebesar 8,55 persen. Selanjutnya

In terms of volume, palm oil exports during 2019 to 2022 tend to decrease. However, in 2023 the volume of palm oil exports increased. The largest decline in palm oil exports occurred in 2020 with an export volume of 27.63 million tons, a decrease of 8.55 percent compared to 2019.

Although export volumes tend to decrease, the decline is not in line with the value of palm oil exports which tend to increase. Based on the publication of the World Bank Commodities Price Data (The Pink Sheet), in 2017 there was an increase in the average price of palm oil in the world market of 751 US\$/mt, resulting in an increase in export value of up to 27.32 percent compared to 2016. The price increase did not last long because in 2018 and 2019, the price of palm oil decreased again to 639 US\$/mt in 2018 and 601 US\$/mt in 2019. In 2020, the price of palm oil in the world market soared again to 752 US\$/mt. The price increase caused an increase in export value by 16.94 percent compared to 2019, although in terms of palm oil export volume it decreased by 8.55 percent. Furthermore, in 2021 - 2022, palm oil prices rose again, causing a significant increase in export value to 29.75 billion US\$ in 2022. In 2023, although

pada tahun 2021–2022, harga minyak sawit kembali naik, sehingga menyebabkan peningkatan nilai ekspor secara signifikan menjadi 29,75 miliar US\$ pada tahun 2022. Tahun 2023, meskipun volume mengalami peningkatan dibanding tahun 2022, tetapi nilai ekspor justru mengalami penurunan sebesar 19,29 persen yaitu sebesar 24,01 miliar US\$.

the volume has increased compared to 2022, the export value actually decreased by 19.29 percent, amounting to 24.01 billion US\$.

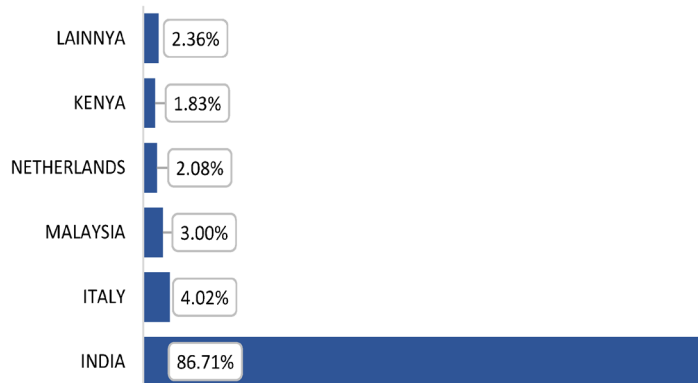

Gambar 5. Volume dan Nilai Ekspor Minyak Sawit, 2019–2023

Figure 5. Volume and Value Export of Palm Oil, 2019–2023

Produksi minyak sawit Indonesia sebagian besar diekspor ke mancanegara dan sisanya dipasarkan di dalam negeri. Ekspor minyak kelapa sawit Indonesia menjangkau lima benua yaitu Asia, Afrika, Australia, Amerika, dan Eropa dengan pangsa utama di Asia. Pada tahun 2023, lima besar negara pengimpor CPO Indonesia adalah India, Italia, Malaysia, Belanda, dan Kenya. Total ekspor CPO ke lima negara tersebut mencapai 97,64 persen terhadap total ekspor CPO Indonesia. Negara tujuan ekspor CPO terbesar yaitu India dengan volume ekspor 3,12 juta ton atau 86,71 persen dari total volume ekspor CPO Indonesia dengan nilai US\$ 2,63 miliar. Selanjutnya CPO paling banyak diekspor menuju Italia dan Malaysia dengan kontribusi ekspor sebesar 4,02 persen dan 3,00 persen dari total ekspor CPO.

Indonesia's palm oil production is mostly exported to foreign countries and the rest is marketed domestically. Indonesia's palm oil exports reach five continents, namely Asia, Africa, Australia, America, and Europe with the main share in Asia. In 2023, the top five Indonesian CPO importing countries are India, Italy, Malaysia, Netherlands, and Kenya. Total CPO exports to the five countries reached 97.64 percent of Indonesia's total CPO exports. The largest CPO export destination country is India with an export volume of 3.12 million tons or 86.71 percent of Indonesia's total CPO export volume with a value of US\$ 2.63 billion. Furthermore, CPO is exported the most to Italy and Malaysia with export contributions of 4.02 percent and 3.00 percent of total CPO exports.

Gambar 6. Volume Ekspor CPO menurut Negara Tujuan, 2023

Figure 6. Volume Export of Palm Oil by Country of Destination, 2023

2.4.2. Impor Minyak Sawit

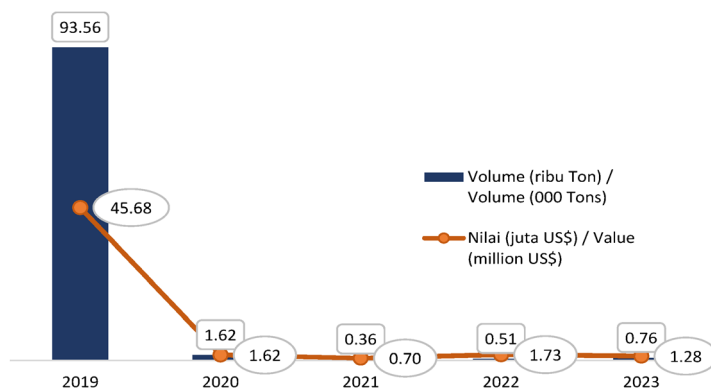

Volume impor minyak sawit selama periode tahun 2019 sampai 2023 cenderung cukup fluktuatif. Total volume impor minyak kelapa sawit pada tahun 2019 tercatat sebesar 93,56 ribu ton dengan nilai sebesar US\$ 45,68 juta. Pada tahun 2020 volume impor minyak sawit mengalami penurunan cukup signifikan menjadi 1,62 ribu ton. Pada tahun 2021, volume impor kembali turun menjadi 0,36 ribu ton dengan nilai sebesar US\$ 0,70 juta. Selanjutnya, pada tahun 2022 volume impor meningkat menjadi 0,51 ribu ton dengan nilai sebesar US\$ 1,73 juta. Tahun 2023, volume impor juga meningkat menjadi 0,76 ribu ton dengan nilai sebesar US\$1,28 juta.

Jika pada tahun 2019, impor minyak sawit didominasi oleh Other Palm Oil (HS 15119000) yang mencapai 94% dari total impor minyak sawit, maka pada tahun 2020 impor didominasi oleh Other Palm Oil Kernel (HS 15132900) yang volumenya tidak jauh berbeda dengan Other Palm Oil (HS 15119000), masing-masing sebesar 0,664 ribu ton dan 0,657 ribu ton. Selanjutnya, pada tahun 2021-2023, impor minyak sawit kembali didominasi oleh Other Palm Oil (HS 15119000) dengan volume impor tahun 2023 sebesar 0,756 ribu ton dengan nilai sebesar US\$ 1,274 juta.

2.4.2. Import of Palm Oil

The volume of palm oil imports during the period from 2019 to 2023 tends to fluctuate quite volatile. The total volume of palm oil imports in 2019 was recorded at 93.56 thousand tons with a value of US\$ 45.68 million. In 2020, the volume of palm oil imports decreased significantly to 1.62 thousand tons. In 2021, import volume fell again to 0.36 thousand tons with a value of US\$ 0.70 million. Furthermore, in 2022 the import volume increased to 0.51 thousand tons with a value of US\$ 1.73 million. In 2023, import volume will also increase to 0.76 thousand tons with a value of US\$ 1.28 million.

If in 2019, palm oil imports were dominated by Other Palm Oil (HS 15119000) which reached 94% of total palm oil imports, then in 2020 imports were dominated by Other Palm Oil Kernel (HS 15132900) whose volume is not much different from Other Palm Oil (HS 15119000), respectively of 0.664 thousand tons and 0.657 thousand tons. Furthermore, in 2021-2023, palm oil imports are again dominated by Other Palm Oil (HS 15119000) with an import volume in 2023 of 0.756 thousand tons with a value of US\$ 1.274 million.

BADAN PUSAT STATISTIK

RAHASIA

I. PENGENALAN TEMPAT			
1. Nama Perusahaan/ Kantor Administratur :			
a. Alamat :			
Kode Pos :		Telepon :	-
E-mail :		Fax :	-
b. Provinsi			
c. Kabupaten/Kota ^{*)}			
d. Kecamatan			
e. Desa/Kelurahan			
f. Nama PIC	No. HP/Telepon :		-
g. Jabatan PIC	Jenis Kelamin :	Laki-laki - 1	Perempuan - 2
h. Nama bagian/divisi/unit kerja PIC			
i. Status	Aktif / Tutup / Tutup Sementara		
j. Koordinat Lokasi Perusahaan	Lintang (Latitude)		
	Bujur (Longitude)		
k. KBLI (Klasifikasi Baku Lapangan Usaha Indonesia)			
2. Nama Kantor Pusat : (Diisi Jika Memiliki Kantor Pusat)			
a. Alamat :			
Kode Pos :		Telepon :	-
E-mail :		Fax :	-
b. Provinsi			
c. Kabupaten/Kota ^{*)}			
3. Nama Group Perusahaan : (Diisi Jika Memiliki Group Perusahaan)			
a. Alamat :			
Kode Pos :		Telepon :	-
E-mail :		Fax :	-
b. Provinsi			
c. Kabupaten/Kota ^{*)}			
II. KETERANGAN PERUSAHAAN/KANTOR ADMINISTRATUR			
1. Status permodalan/Pemilikan	PMDN - 1	PMA - 2	
2. Bentuk Badan Hukum	Persero/Perum Perusahaan Daerah (PD) Badan Usaha Milik Daerah (BUMD) Perseroan Terbatas (PT) Koperasi/KUD Yayasan	- 1 <i>Naamloze Vennootschap</i> (NV) - 2 <i>Comanditaire Vennootschap</i> (CV) - 3 Firma - 4 Perwakilan Perusahaan / - 5 Lembaga Asing	- 6 - 7 - 8 - 9
3. Apakah sebagai Pelaksana Kemitraan?	Ya - 1	Tidak - 2	
4. Apakah mempunyai Kebun Plasma yg belum dikonversi?	Ya - 1	Tidak - 2	
5. Apakah mempunyai unit pengolahan produksi?	Ya - 1	Tidak - 2	
6. Tahun Berdiri/Operasional Perusahaan			
7. Apakah merupakan Kebun atau Pabrik atau (Kebun dan Pabrik)?	Kebun - 1	Pabrik - 2	Kebun dan Pabrik - 3

^{*)} Coret yang tidak sesuai

Lanjutan Lampiran 1

Continued Appendix 1

III. LUAS TANAMAN DAN JUMLAH POHON				
Nama Kebun	Luas Areal (Ha)			Jumlah Pohon
	TBM	TM	TTM/ATP	
(1)	(2)	(3)	(4)	(5)
1. Kebun Sendiri (HGU dan Kebun Plasma yang belum dikonversi)				
2. Kebun Plasma (Kebun Plasma yang sudah dikonversi, termasuk Perkebunan Rakyat)				
3. Pembelian dari Pihak Ketiga (Perusahaan Lain)				
Keterangan Pabrik	Ton/Jam			
4. Kapasitas Terpasang (Ton/Jam)				

IV. PRODUKSI									
1. Nama Produk Utama yang dihasilkan:								Kode KBKI (diisi oleh BPS)	
Nama Kebun	Produksi dari Areal TM (Ton)			Produksi dari Areal TTM/ATP (Ton)			Rendemen CPO (%)	Rendemen Inti Sawit (%)	
	TBS	CPO	Inti Sawit	TBS	CPO	Inti Sawit			
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	
2. Kebun Sendiri (HGU dan Kebun Plasma yang belum dikonversi)									
3. Kebun Plasma (Kebun Plasma yang sudah dikonversi, termasuk Perkebunan Rakyat)									
4. Pembelian dari Pihak Ketiga (Perusahaan Lain)									
5. Total									

V. KETERANGAN PETUGAS		
Uraian	Pencacah	Pemeriksa
1. Nama		
2. Tanggal		
3. Tanda Tangan		

VI. CATATAN DAN PENGESAHAN	
CATATAN	Diisi Dengan Sebenarnya <i>Administratur/Pengurus</i> (Nama jelas, tanda tangan dan stempel perusahaan)
