I PENDAHULUAN/INTRODUCTION

1.1 Latar Belakang

Sektor Pertanian, Kehutanan, dan Perikanan memiliki peranan penting dalam perekonomian, terutama di negara-negara berkembang, termasuk Indonesia. Pada tahun 2023, sektor ini menyumbang sekitar 12,53 persen terhadap Produk Domestik Bruto (PDB) Indonesia, menempatkannya di posisi ketiga setelah sektor Industri Pengolahan (18,67 persen) dan sektor Perdagangan Besar dan Eceran, Reparasi Mobil, dan Sepeda Motor (12,94 persen) (BPS, 2024). Meskipun kontribusi sektor ini secara bertahap menurun seiring dengan meningkatnya dominasi sektor jasa dan industri, sektor ini tetap penting dalam menjaga ketahanan pangan dan mendukung keberlanjutan ekonomi.

Sektor Pertanian, Kehutanan, dan Perikanan mencakup Subsektor Tanaman Pangan, Tanaman Hortikultura, Tanaman Perkebunan, Peternakan, Jasa Pertanian dan Perburuan, Kehutanan dan Penebangan Kayu, serta Perikanan. Di antara beberapa subsektor tersebut, Subsektor Perkebunan mempunyai potensi yang cukup besar untuk mendorong perekonomian. Selain berkontribusi terhadap pertumbuhan ekonomi, Subsektor Perkebunan juga berperan penting dalam penyediaan lapangan kerja, terutama bagi masyarakat di pedesaan. Pada tahun 2023, subsektor ini memberikan kontribusi terbesar terhadap PDB Sektor Pertanian, Kehutanan, dan Perikanan, yaitu sebesar 30,99 persen. Sementara itu, kontribusi subsektor ini terhadap total PDB nasional mencapai 3,88 persen (BPS, 2024). Oleh karena itu, Subsektor Perkebunan perlu dioptimalkan potensinya untuk meningkatkan kesejahteraan masyarakat.

Karet merupakan salah satu komoditi hasil perkebunan yang mempunyai peran

1.1 Background

The Agriculture, Forestry, and Fisheries sectors play a crucial role in the economy, particularly in developing countries, including Indonesia. In 2023, these sectors accounted for approximately 12.53 percent of Indonesia's Gross Domestic Product (GDP), ranking third behind the Manufacturing Industry sector (18.67 percent) and the Wholesale and Retail Trade, Repair of Motor Vehicles and Motorcycles sector (12.94 percent) (BPS, 2024). Although the contribution of these sectors is gradually declining due to the growing dominance of the service and industrial sectors, these sectors continue to be essential for ensuring food security and supporting economic sustainability.

The Agriculture, Forestry and Fisheries Sector includes the Food Crops, Horticultural Crops, Plantation Crops, Livestock, Agricultural and Hunting Services, Forestry and Logging, and Fisheries subsectors. Among these subsectors, the Plantation Subsector has quite large potential to stimulate the economy. Apart from contributing to economic growth, the Plantation Subsector also plays an important role in providing employment opportunities, especially for people in rural areas. In 2023, this subsector will make the largest contribution to GDP in the Agriculture, Forestry and Fisheries Sector, namely 30.99 percent. Meanwhile, the contribution of this subsector to total national GDP reached 3.88 percent (BPS, 2024). Therefore, the Plantation Subsector needs to optimize its potential to improve community welfare.

Rubber is one of the plantation commodities which has quite an important role in economic activities in Indonesia. Rubber

cukup penting dalam kegiatan perekonomian di Indonesia. Karet juga salah satu komoditas ekspor Indonesia yang cukup besar sebagai penghasil devisa negara selain minyak dan gas. Indonesia merupakan negara produsen dan eksportir karet terbesar dunia.

Selain peluang ekspor yang semakin terbuka, pasar karet di dalam negeri masih cukup besar. Pasar potensial yang akan menyerap pemasaran karet adalah industri ban, otomotif, aspal, dan lain-lain. Badan Pusat Statistik menerbitkan buku Statistik Karet Indonesia 2023 yang diperlukan untuk memberi informasi mengenai potensi karet Indonesia dalam rangka menunjang peningkatan pembangunan industri karet Indonesia.

1.2 Ruang Lingkup

Publikasi ini memuat data dan ulasan ringkas tentang perkembangan luas areal dan produksi karet yang dirinci menurut status pengusaannya yaitu perkebunan besar negara, perkebunan besar swasta, dan perkebunan rakyat yang disajikan menurut provinsi. Perkembangan ekspor dan impor karet Indonesia disajikan menurut jenis komoditas (kode HS - Harmony System) dan negara tujuan/asal.

1.3 Metodologi

Data yang disajikan dalam publikasi ini berupa tabel-tabel, gambar/grafik dan ulasan ringkas yang berupa analisis deskriptif dengan melihat pada pertumbuhan, distribusi, dan kontribusi atau persentase. Data luas areal dan produksi diperoleh dari Fungsi Statistik Tanaman Perkebunan, data ekspor impor diperoleh dari Fungsi Statistik Ekspor dan Fungsi Statistik Impor, dan data lainnya berasal dari sumber lain seperti Direktorat Jenderal Perkebunan, Kementerian Pertanian.

is also one of Indonesia's export commodities which is quite large as a foreign exchange earner besides oil and gas. Indonesia is the world's largest rubber producer and exporter.

Apart from increasingly open export opportunities, the domestic rubber market is still quite large. Potential markets that will absorb rubber marketing are the tire, automotive, asphalt and other industries. The Central Statistics Agency published the book Indonesian Rubber Statistics 2023 which is needed to provide information about the potential of Indonesian rubber in order to support increased development of the Indonesian rubber industry.

1.2 Scope

This publication contains data and a brief overview of the development of area and rubber production detailed according to business status, namely large state plantations, large private plantations and smallholder plantations presented by province. The development of Indonesian rubber exports and imports is presented according to commodity type (HS code - Harmony System) and country of destination/origin.

1.3 Methodology

The data presented in this publication are in the form of tables, pictures/graphs and brief reviews in the form of descriptive analysis by looking at growth, distribution, and contribution or percentage. Area and production data were obtained from the Plantation Crop Statistics Function, import export data was obtained from the Export Statistics Function and Import Statistics Function, and other data came from other sources such as the Directorate General of Plantations, Ministry of Agriculture.

Data luas areal dan produksi perkebunan besar negara dan swasta diperoleh dari hasil Survei Perusahaan Perkebunan yang dilakukan melalui pencacahan secara lengkap terhadap seluruh Administratur Perkebunan di seluruh Indonesia. Pengumpulan data dilakukan dengan cara wawancara langsung oleh petugas BPS ke kantor Administratur Perkebunan sesuai periode survei. Periode survei yang dilakukan oleh BPS adalah triwulanan dan tahunan. Pada publikasi ini, data luas dan produksi perkebunan negara dan swasta merupakan angka tetap. Sedangkan data luas dan produksi perkebunan rakyat diperoleh dari Direktorat Jenderal Perkebunan, Kementerian Pertanian, dan merupakan angka sementara.

Data Ekspor diperoleh dengan cara pengumpulan data berdasarkan dokumen ekspor/Pemberitahuan Ekspor Barang (PEB) dan Pemberitahuan Ekspor Barang Tertentu (PEBT) yang diisi oleh eksportir dan telah diberikan ijin muat oleh Direktorat Jenderal Bea dan Cukai dan selanjutnya mengirimkannya ke BPS.

Data Impor diperoleh dengan cara pengumpulan data berdasarkan dokumen impor/Pemberitahuan Impor Barang (PIB) yang diisi oleh importir dan telah diberikan ijin bongkar oleh Direktorat Jenderal Bea dan Cukai dan selanjutnya mengirimkan dokumen tersebut ke BPS.

Data on the area and production of large state and private plantations were obtained from the results of the Plantation Company Survey which was carried out through a complete enumeration of all Plantation Administrators throughout Indonesia. Data collection was carried out by means of direct interviews by BPS officers at the Plantation Administrator's office according to the survey period. The survey periods conducted by BPS are quarterly and annually. In this publication, data on the area and production of state and private plantations are fixed figures. Meanwhile, data on the area and production of smallholder plantations were obtained from the Directorate General of Plantations, Ministry of Agriculture, and are preliminary figures.

Export data is obtained by collecting data based on export documents/Goods Export Notifications (PEB) and Export Notifications for Certain Goods (PEBT) which are filled in by exporters and have been given loading permits by the Directorate General of Customs and Excise and then sending them to BPS.

Import data is obtained by collecting data based on import documents/Goods Import Notifications (PIB) which are filled in by importers and have been given unloading permits by the Directorate General of Customs and Excise and then sending these documents to BPS.

Estate Crops Establishment is an Indonesian citizen estate crops business actor or a legal entity established under Indonesian law and domiciled in Indonesia that manages an estate crops business on a certain scale.

Large Estate Crops are estate crops that are organized or managed

dikelola secara komersial oleh perusahaan yang berbadan hukum. Perkebunan besar terdiri atas Perkebunan Besar Negara (PBN) dan Perkebunan Besar Swasta (PBS) Nasional/ Asing.

Perkebunan Rakyat (PR) (tidak berbadan hukum) adalah perkebunan yang diselenggarakan atau dikelola oleh rakyat/ pekebun yang dikelompokkan dalam usaha kecil tanaman perkebunan rakyat dan usaha rumahtangga perkebunan rakyat.

Tanaman Belum Menghasilkan (TBM) adalah tanaman yang sampai pada saat pengamatan belum pernah memberikan hasil, karena masih muda atau tanaman sudah cukup umur tetapi belum dapat menghasilkan karena tidak cocok dengan iklim, ketinggian tempat, kondisi tanah dan sebagainya.

Tanaman Menghasilkan (TM) adalah tanaman yang sebelum saat pengamatan pernah memberikan hasil dan masih akan memberikan hasil, meskipun pada saat pengamatan sedang tidak menghasilkan.

Tanaman Tidak Menghasilkan/Tua/ Rusak (TTM) adalah tanaman yang sudah tua, rusak, dan tidak memberikan hasil yang memadai lagi, walaupun ada hasilnya tetapi secara ekonomi sudah tidak produktif lagi (produksi kurang dari 15 persen dari produksi normal).

Produksi karet yang disajikan pada publikasi ini berupa produksi olahan yaitu produksi primer yang telah diolah menjadi suatu bentuk barang jadi atau barang setengah jadi, sehingga nilai ekonomisnya lebih tinggi, dalam hal ini **karet kering**.

commercially by an establishment with a legal entity. Large estate crops consist of Government Estate Crops Establishment and Private Estate Crops Establishment.

Smallholders Estate Crops (unincorporated) are estate crops organized or managed by the people/ smallholders who are grouped into small businesses, small-scale small.

Immature Crops are crops that until the time of observation have never given results, because they are young or the crops are old enough but have not been able to produce because they do not match the climate, the height of the place, soil conditions and so on.

Mature Crops are crops that have previously given production and will still give productions, even though at the time of observation they are not producing.

Non-Productive/Old/Damaged Crops are crops that are old, damaged, and no longer provide adequate yields, even though there are productions but are no longer economically productive (production is less than 15 percent of normal production).

The rubber production presented in this publication is in the form of processed production, namely primary production that has been processed into a form of finished goods or semi-finished goods, so that the economic value is higher, in this case **dry rubber**.

II ULASAN RINGKAS/SHORT REVIEW

2.1 Perkembangan Luas Areal Perkebunan Karet

Perkebunan karet di Indonesia menurut pengusahaannya dibedakan menjadi Perkebunan Besar (PB) dan Perkebunan Rakyat (PR). Perkebunan Besar terdiri dari Perkebunan Besar Negara (PBN) dan Perkebunan Besar Swasta (PBS).

Pada tahun 2021, luas areal PBN karet Indonesia tercatat 129,25 ribu hektar, menurun 0,379 persen menjadi 128,76 ribu hektar pada tahun 2022. Tahun 2023, luas areal menjadi 122,88 ribu hektar atau mengalami penurunan sebesar 4,57 persen.

Sedangkan luas areal PBS karet Indonesia pada tahun 2021 tercatat 213,96 ribu hektar, menurun 22,788 persen menjadi 165,2 ribu hektar pada tahun 2022. Pada tahun 2023 luas areal menjadi 179,67 ribu hektar atau terjadi peningkatan sebesar 8,759 persen.

Data luas areal PR karet di Indonesia merupakan data yang diperoleh dari Dirjen Perkebunan, Kementerian Pertanian. Dilihat dari perkembangan selama tiga tahun luas areal PR cenderung menurun. Pada tahun 2021 luas yang diusahakan oleh PR seluas 3.433,28 ribu hektar, menurun 4,956 persen atau menjadi 3.263,13 ribu hektar pada tahun 2022 dan tahun 2023 menurun sekitar 12,654 persen menjadi seluas 2.850,2 ribu hektar. Perkembangan luas areal perkebunan karet menurut status perusahaan tahun 2021–2023 disajikan pada Gambar 1.

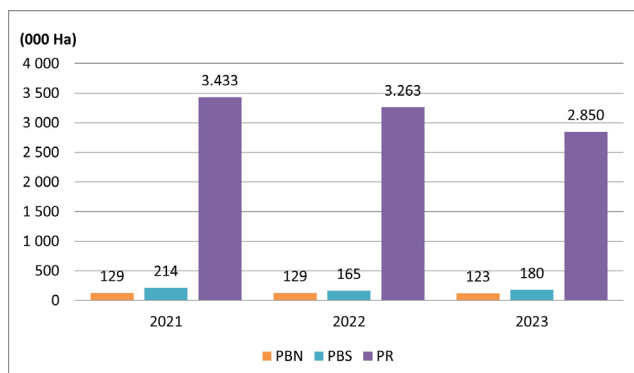

2.1 The Trend of Rubber Plantation Area

Rubber plantations in Indonesia are divided into large plantations (PB) and community plantations (PR) according to their operation. Large Plantations consist of Large State Plantations (PBN) and Large Private Plantations (PBS).

In 2021, Indonesia's PBN rubber area was recorded at 129.25 thousand hectares, decreasing 0.379 percent to 128.76 thousand hectares in 2022. In 2023, the area will be 122.88 thousand hectares or a decrease of 4.57 percent.

Meanwhile, the area of Indonesian rubber PBS in 2021 was recorded at 213.96 thousand hectares, decreasing 22.788 percent to 165.2 thousand hectares in 2022. In 2023 the area will be 179.67 thousand hectares or an increase of 8.759 percent.

Data on the area of rubber PR in Indonesia is data obtained from the Director General of Plantations, Ministry of Agriculture. Judging from developments over the three years, the area of PR tends to decrease. In 2021, the area cultivated by PR is 3,433.28 thousand hectares, decreasing by 4.956 percent or to 3,263.13 thousand hectares in 2022 and in 2023 it will decrease by around 12.654 percent to 2,850 hectares. The development of rubber plantation area according to business status in 2021–2023 is presented in Figure 1.

Of the various types of natural rubber products based on the HS code, the largest imports of natural rubber are *Scrap (Tree, Earth, or Smoked) and cup lump* (HS 40012980) amounting to 86.83 percent of the total imports of natural rubber, *Natural rubber latex, Centrifuge concentrate, containing ammonia* $\geq 0.5\%$ (HS 40011011) at 4.75 percent, followed by various other types of natural rubber products.

The total volume of natural rubber imports over the last thirteen years has fluctuated greatly. The total volume of natural rubber imports in 2011 was recorded at 16.63 thousand tons with a value of US\$ 62.4 million. In 2023, natural rubber imports will increase quite rapidly to 178.61 thousand tons with a value of US\$ 150.42 million (see Figure 9).

Perkembangan Impor Karet Sintetis

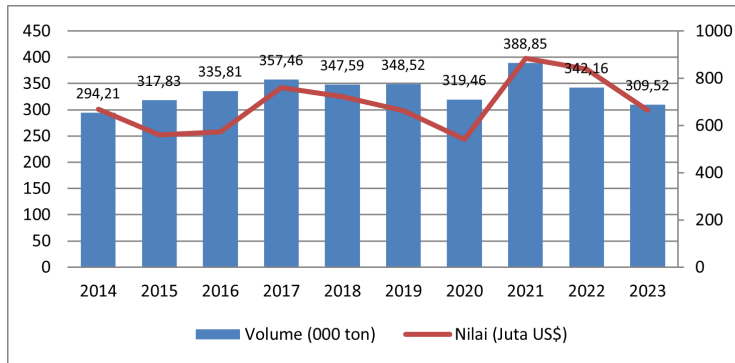

Dari berbagai jenis produk karet sintetis berdasarkan kode HS, impor karet sintetis yang paling besar adalah SBR, XSBR, other than latex, other than in primary forms or in vulcanised, uncompound plates, sheets, or strips (HS 40021990) sebesar 22,43 persen dari total impor karet sintetis, Synthetic rubber, Butadiene rubber (BR) other than in primary forms (HS 40022090) sebesar 21,12 persen, diikuti berbagai jenis produk karet sintetis lainnya.

Total volume impor karet sintetis selama sepuluh tahun terakhir cukup berfluktuasi. Total volume impor karet sintetis pada tahun 2014 tercatat sebesar 294,21 ribu ton dengan nilai US\$ 669,9 juta. Pada tahun 2023 impor karet sintetis tercatat sebesar 309,52 ribu ton dengan nilai US\$ 664,58 juta atau terjadi penurunan 9,54 persen dari tahun 2022 (lihat Gambar10).

The Trend of Synthetic Rubber Imports

Of the various types of synthetic rubber products based on the HS code, the largest imports of synthetic rubber are SBR, of total synthetic rubber imports, Synthetic rubber, Butadiene rubber (BR) other than in primary forms (HS 40022090) amounted to 21.12 percent, followed by various other types of synthetic rubber products.

The total volume of synthetic rubber imports over the last ten years has fluctuated quite a bit. The total volume of synthetic rubber imports in 2014 was recorded at 294.21 thousand tons with a value of US\$ 669.9 million. In 2023, imports of synthetic rubber were recorded at 309.52 thousand tons with a value of US\$ 664.58 million or a decrease of 9.54 percent from 2022 (see Figure10).
